

Bazigh Ali Minhas

SENIOR PYTHON ENGINEER | BACKEND • DATA • AI AUTOMATION

+92-348-272-7605 · bazighminhas1@gmail.com · <https://www.linkedin.com/in/bazighaliminhas/>
· <https://github.com/bazighaliminhas> · Lahore, Pakistan

Senior Python Engineer with 6+ years of experience building scalable backend systems, REST APIs, data pipelines, and AI-powered automation using Python, FastAPI, Django, PostgreSQL, Redis, Celery, and AWS. Strong in async processing, ETL/data workflows, RAG/LLM integrations, database optimization, testing, and production deployment.

EXPERIENCE

Senior Python Engineer

2024 – Present

WinLogics — Remote

- Build scalable **Python/FastAPI/Django services and REST/GraphQL APIs** using PostgreSQL, Redis, Celery, Docker, and AWS.
- Design **async workers, ETL/data pipelines, caching, scheduled jobs, and third-party integrations**, improving processing efficiency by approximately **30%**.
- Develop **RAG, LLM, document-processing, and AI automation workflows** using OpenAI/Claude/Gemini APIs and vector search.
- Own **query optimization, testing, CI/CD, monitoring, and production deployments**, ensuring reliable backend services.

Python / Full-Stack Engineer

2022 – 2024

10Pearls — Hybrid

- Developed production applications using Python, Django/FastAPI, PostgreSQL, Redis, REST APIs, WebSockets, and Celery for customer-facing platforms.
- Built data ingestion, transformation, scheduled workflows, CRM/payment integrations, background jobs, and AI-enabled backend features.
- Improved performance through query optimization, caching, async processing, testing, and monitoring, reducing service latency by approximately **25%**.

Software Engineer — Python & Backend

2020 – 2022

Systems Limited — Onsite

- Developed enterprise backend services using Python, Django/Flask, PostgreSQL/MySQL, SQLAlchemy, REST APIs, Redis, and Docker.
- Built internal APIs, data-processing workflows, authentication modules, scheduled jobs, and reusable backend components.
- Improved production stability through query tuning, validation, caching, automated testing, structured logging, and CI/CD, reducing recurring issues by approximately **20%**.

EDUCATION

Bachelor of Science in Computer Science

2016 – 2020

COMSATS University Islamabad

PROJECTS

AgentFlow AI — AI Automation SaaS Platform

Python | FastAPI | PostgreSQL | Redis | Celery | OpenAI | AWS

- Built an AI-powered SaaS platform with **RAG, document processing, background jobs, scheduled automation, structured outputs, and API integrations.**

DataPulse — Real-Time Data Processing Platform

Python | FastAPI | Kafka | PostgreSQL | Redis | Pandas | Docker

- Developed data pipelines for **ingestion, transformation, validation, async processing, monitoring, and API-based delivery.**

CareAI — Intelligent Healthcare Platform

Python | Django/FastAPI | PostgreSQL | Redis | OpenAI | AWS

- Built a healthcare backend with **appointments, patient records, RBAC, document workflows, notifications, and AI-assisted information extraction.**
-

SKILLS

— Python Backend: Python · Django · FastAPI · Flask · REST APIs · GraphQL · WebSockets · Pydantic

— Data & Async: Pandas · NumPy · ETL/ELT · Data Transformation · PostgreSQL · MySQL · MongoDB · Redis · SQL

— Async & Architecture: Celery · AsyncIO · Background Jobs · Microservices · Event-Driven Architecture ·
Clean Architecture

— AI & Automation: OpenAI · Claude · Gemini · LangChain · RAG · AI Agents · Prompt Engineering ·
Workflow Automation

— AI & Integrations: OAuth 2.0 · OAuth 2.0 · JWT · RBAC · Webhooks · Third-Party APIs · OpenAPI/Swagger ·
API Security

— Cloud & Quality: AWS · Docker · CI/CD · GitHub Actions · Linux · Pytest · Monitoring · Git · Postman
